- The diagram illustrates the structure of a C program, showing the relative sizes of its components. The components are represented by boxes of varying lengths, indicating their relative size in the program. The main function is the largest component, followed by the function definition. The preprocessor directive and comment are the smallest components.

 - `#include <stdio.h>` (Preprocessor directive)
 - `/*` (Comment)
 - `int main() {` (Function definition)
 - `printf("Hello, World!\n");` (Function call)
 - `return 0;` (Return statement)
 - `}` (Closing brace for main function)
